Change Notice – Water Meter Sizing

Effectively immediately the Planning, Property & Buildings Department will be responsible for the sizing of all water meters for new building water services. The Planning, Property and Buildings Department will inform the property owner, contractor and the City of Brandon Water Treasury Department, via email, the size of the meter required for the building if the meter is larger than the min 5/8”.

The process for single and two-detached dwellings will remain unchanged with a min 5/8” meter supplied at no cost to the applicant. All meters larger than the min 5/8” are cost shared by the applicant and the City, with the applicant paying the difference in cost between the 5/8” meter and the meter size required for the building.

For your reference, please see www.brandon.ca

Water and Wastewater Control By-Law No. 5957/114/91.

Division II: Meters

Please direct any questions or requests for information to one of the plumbing inspectors.
