Request:

I am requesting an amendment to for property 4151 Mctavish Ave, Brandon, MB. In regards to Conditional Use Decision C-08-15-B. Under this Conditional use it was specified that the service entrance enclosures would be (0.76m projection & 1.86m² floor area.) To accommodate hydro equipment these service enclosures had to be built as 40" x 21' long (1.016m projection & 6.50m² floor area.) Without these service enclosures the buildings will not be able to function.

Proposed changes meeting the three criteria for approving a conditional use application.

1) Will be compatible with the general nature of the surrounding area;

- With the three units located on the East side (Lots 4, 5, 6) the enclosures to be moved to the West sides of the buildings. This will make it where service needs will not interfere with the neighboring lot to the East (in terms of future needs, hard to fit equipment inbetween buildings and lot to the East.) Also will make it easier for services to be checked on a regular basis & general meter readings.
- The three lots to the West (lots 1, 2) the enclosures will face to the west. Lot 3 the enclosure was made facing south. These enclosures were faced away from the east (parking lot). This allows for access to future needs as well as its accessed from the street sides.
- Overall With the way that this is proposed it makes it easier for all services to be hooked up at the same sides of the buildings. As well accommodates current & future needs.

2) Will not be detrimental to the health or general welfare of people living or working in the surrounding area, or negatively affect properties or potential development in the surrounding area;

- In regards to the service enclosures, without increasing them in size we would not of been able to supply power to the buildings.
- The locations of where the service enclosures will make it more accessible to service providers. As well as the location will make it easier for future developments (being that the east lots enclosures will face into the parking lot. And the east lots are facing 42nd st.)
- Also in regards to the general welfare of people living in the units. It would make more sense to move them into a common view of the general population. It makes it where the major power source of the units are less likely to be tampered with when its in general view. (kids playing around)

3) Is generally consistent with the applicable provisions of the development by-law, the zoning by-law and any secondary play by-law.

- Without making these changes we wouldn't of been able to make the hydro equipment fit into a code certified sized building.
- In regards to the by-law. We are under the 1.5m projection in the sideyards (1.041m projection of the service enclosures.)
