-  Fat Bike Trail - Groomed in Winter
-  Hanbury Hill Bike and Hike Trail
-  Greenspaces
-  Splash Parks
-  Skating Oval ❄️
-  Toboggan Hills ❄️
-  City Limits

The City Loop Trail has km markers installed on the entire 20 km route. The markers are a great way for active people to track the distance that they have travelled as part of their exercise routine.

The trail markers are also helpful in case of an emergency. If a person should become injured or ill along with the trail system the marker identification can be given to 911 and fire/ emergency and police services will know where they are located.

 The Share the Road Project is identified as a preferred route for cross-town bicycle traffic which would allow for connections to work, recreation, and commercial areas along the way.

Many paved paths are cleared of snow to make staying active year-round easier.

Use the bus to extend your trip!

As all of our buses are equipped with racks, most bikes can be accommodated on Brandon Transit buses. Bring your bike with you at any time throughout the year for no extra charge. Be sure the bike is ready to go before the bus arrives, with nothing that will interfere with the operator's vision. Racks hold a maximum of two (2) bikes, first come first served.
