Re: Zoning Amendment Application for 1890 65th Street East (Lot 2 Plan 22346 BLTO)

Zoning Request

Seal-On Paving Ltd. is applying to rezone 1890-65th Street East (Lot 2 Plan 22346 BLTO) in Brandon Manitoba from Development Reserve (DR) Zone to Industrial Heavy (IH) Zone to allow for the development of two storage tanks on the property.

Proposed Use of the Property

The proposed use for the property will be the erection of two outdoor storage containers in the south-east corner of the site, that will hold Liquid Asphalt Cement. The Liquid Asphalt Cement will be brought in on rail cars from the adjacent CN rail line to the north and stored in the two proposed storage tanks until ready for use in the Emulsion Plant located on the adjacent property at 65 Limestone Road. The Liquid Asphalt Cement will be transported to the adjacent site by trucks, using an internal roadway that joins the two properties.

The property was previously used for aggregate mining purposes. That use has been completed and the owner is currently working with the Province of Manitoba on the reclamation of the site. Once this work has been completed, the property will be ready for the proposed use of two storage tanks.

Development Plan & Zoning By-Law

The property is designated Industrial as indicated on Map 1: Urban Land Use in the Brandon & Area Planning District Development Plan 2013 By-law 95/01/12. The property is zoned as Development Reserve according to the City of Brandon Zoning By-law 7124. The property will be rezoned to Industrial Heavy Zone to allow for the proposed use of two storage tanks. This use falls under Storage Facilities under Table 15: Industrial Use Table in the City of Brandon Zoning Bylaw 7124, and is a permitted use in the Industrial Heavy Zone.

Environmental Concerns

There are no environmental concerns currently with the property or with the proposed use. Liquid Asphalt Cement is a low risk substance since it does not penetrate the soil at any significant depth before it solidifies, forming a hard surface (similar to an asphalt road) and does not contaminate the soil, surface water, or ground water. As such secondary containment is not required. If a spill of Asphalt Cement were to occur the material would be recovered, reheated, and placed back in a tank.

Secondary Plans

There is no Secondary Plan, Neighbourhood Plan or any other area plans or policies that affect this property.

If there are any questions related to this application, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. McMillan', with a long horizontal stroke extending to the right.

Steve McMillan, RPP
