Re: Conditional Use Application for south lot at 1534 9th Street, Brandon, MB

Please consider this letter of intent as part of our application for conditional use to construct a duplex on 1534 9th Street in Brandon MB. According to table 9 of the City of Brandon Zoning by-law 7214, part 3, Division 1, duplex dwellings in the RSD zone are permitted only under conditional use. Additionally, an interior lot of less than 15.2m wide in width is permitted with conditional use. Our application addresses these two items. This letter is submitted to you by Ty Worthington on behalf of 10116050 Manitoba Ltd.

The existing property on 1534 9th Street features a large existing two story house with a covered porch and garage. The existing garage and covered porch would be removed to make room for the new building with the existing home remaining untouched. The legal description of the property is 'Lot 33/35, Block 2, Plan 289'. Currently, the size of the property is 75' (22.86 M). Lot 33 will be split from the title to build a 1275 sq ft duplex on the south portion of the property which will have dimensions of 5.5m wide x 22.86m long.

The proposed development will meet the three criteria for approving a conditional use application:

1) Will it be generally compatible with the nature of the surrounding area?

To fit the building into the surrounding area, we have designed the building as a bi level, having a main living area, kitchen, primary bedroom and bathroom on the main floor, and the remaining bedrooms on the second floor with a full bathroom and utility/laundry room. This duplex has separate entrances facing East and West which gives the tenants privacy and each an independent space. Please see the plans and elevations submitted with the application that demonstrate the look and feel of the proposed building.

2) Will it be detrimental to the health or general welfare of people living or working in the surrounding area, or negatively affect other properties or potential development in the surrounding area?

The development is a residential build that will comply with all codes and bylaws applicable to the project, negating health and safety concerns to those living in the area. The current dwelling accesses the property directly off of 9th street, crossing a high-traffic pedestrian and bike lane. To mitigate traffic concerns, 2 parking stalls will be available on the West side of the building. Additionally, the development will only bring life back to the existing property and should have no other effect on properties or future development in the area.

3) Is it generally consistent with the applicable provisions of the Development Plan by-laws and any applicable Secondary Plan by-law?

Yes, this is generally consistent with the applicable provisions of the development plan by-law, the zoning by-law and any secondary plan by-law.

If you have any questions or require further information regarding this application, please do not hesitate to contact me by email at rentalswestman@gmail.com or 2047207569

Kind Regards,

Ty Worthington
