

Properties inside the coloured border are those identified to be in an area where watermain services are believed to have been installed prior to 1950. Properties within this area **have the potential** to have a lead water service connection, either from the watermain to the property line, from the property line to the house or both.

The City of Brandon cannot confirm where underground lead services may or may not exist on private property. As such, this map should only be used as a guide to help Brandon property owners determine if they may be impacted by a lead water service connection.
