

Be Stormwater Smart!

Opt for non-motorized modes of transportation to reduce pollution build up on roads and other hard surfaces.

Always direct downspouts away from paved surfaces.

Reduce your need for fertilizers, pesticides, and water. Learn about zeriscaping!

Pick up after your pet and put waste where it belongs.

Compost or utilize a City provided green cart for yard waste to ensure it doesn't wash into a catch basin.

Check your vehicle for leaks and be sure to recycle used motor oil. NEVER dump used oil on the ground or down the catch basin! Always wash your car at a carwash so soap, dirt and grease don't enter the catch basin.

Use a rain barrel to help conserve water and also prevent stormwater pollution.

NEVER pour any kind of waste down the catch basin!

Clear off your driveway and sidewalks and put all yard waste in your green cart rather than hosing down.
